##### Evaluation

5 assignments for a total of 100 marks: Assignment 1 = 15 marks; Assignment 2 = 20 marks; Assignment 3 = 10 marks; Assignment 4 = 15 marks; Assignment 5 = 40 marks

---

##### Course Description

EPSE 406 examines the typical and atypical developmental processes of young children from birth to six years.

The course provides a framework for understanding the impact of disabling conditions on the developmental process.

**Intended Audience:** This is a required course for students enrolled in the Infant Development/Supported Child Care Diploma program.

It is intended for Infant Development Consultants who work with children with special needs and their families from birth to kindergarten entry in home, childcare or pre-school settings and Supported Child Care Consultants who work with children with special needs in childcare and school settings. It would be appropriate for early education/pre-school teachers, pediatric nurses and rehabilitative therapists with a special interest in young children. The prospective students are expected to have completed two years of college and/or university courses. Additionally, it is expected that students will have completed a survey or introductory course on infant and child development.

##### Course Objectives

This online course is intended to provide students with information related to the development of typical and atypical infants and children within a multicultural perspective. By the end of the course, you should be able to:

1. To identify and apply theories of child development to both typical and atypical infants and toddlers; acquire a working knowledge of infant development across all developmental domains. i.e. Cognitive, motor, social-emotional, communication, adaptive.
2. To identify pre-, peri-, and postnatal development and risk factors such as biological and environmental conditions that affect infant/toddler development and learning
3. To identify specific disabilities including etiology, characteristics and classifications of common disabilities in infants and toddlers; describe specific implications for development and learning in the first years of life.

##### Course Summary

Lesson 1: The Context of Early Development      Lesson 2: Genetic and environmental Foundations of Development

Lesson 3: Prenatal Development      Lesson 4: The Newborn and Medically Compromised Births

Lesson 5: Physical Growth, Neuromuscular Development, Motor Skills

Lesson 6: Physical and Motor Disabilities

Lesson 7: Sensation and Perception and Sensory Impairments of Vision and Hearing

Lesson 8: Cognition      Lesson 9: Extremes in Cognitive Development: Delay, Mental Retardation and Giftedness

Lesson 10: Communication and Language      Lesson 11: Emotional and Social Development: Infancy to Age 6

Lesson 12: Disturbance in Emotional and Social Development in Children
